DETAILED ACTION

Response to Amendment

Claims 23-49 have been added and claims 1-22 have been canceled. Hence, claims 23-49 are pending in the application.

Applicant's arguments are persuasive to the extent that the rejections from the previous Office Action have been withdrawn.

Allowable Subject Matter

Claims 23-49 are allowed.

The following is an examiner's statement of reasons for allowance:

The references alone or in combination fail to teach an ink composition comprising more than 70 percent by weight of propylene carbonate and less than 10 percent by weight of water.

The Examiner is relying upon Applicant's arguments for the patentability of the instant claims, specifically Applicant's argument that Yuasa considers water and propylene carbonate is equivalent and that it is critical to control the amount of water to achieve the advantages i.e. marking quality. Applicant also argues that the ink composition of Yuasa would not be suitable for continuous deflected jet printing was found persuasive and therefore the rejection of the claims has been withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
